The maximum span lengths listed are intended for preliminary design only and do not replace the static proof. Due to the density's natural variability, the quantified masses may vary up to  $\pm 15\%$ . ss: outer layers consist of 2 longitudinal layers (l).

## Duration of fire resistance

R0    R30    R60    R90

\*only deflection 1,  $g_{1,k} = 0,5 \text{ kN/m}^2$

$s_k = 1,5 \text{ kN/m}^2$

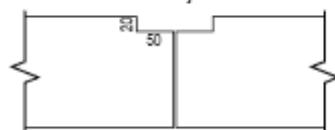

\*\*with vibration 3,  $g_{1,k} = 1,5 \text{ kN/m}^2$

$q_k = 2 \text{ kN/m}^2 \text{ A}$

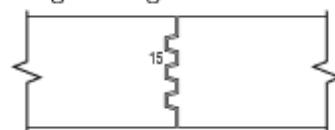

Pre-dimensioning is carried out according to EN 1995-1-1 and technical approval.
